

Commissary

ADVANCED INMATE
SELF-SERVICE
COMMISSARY SALES

TUSA

Tusa Commissary is an interactive inmate self service solution to manage commissary operations in correctional facilities.

Replacing the need for manual ordering; using a touch screen inmates order items and funds are automatically deducted from their account. Through the touch screen inmates can also access account balances and transaction histories.

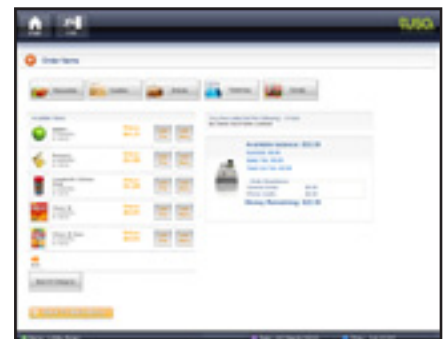

Product images make the electronic store easier to navigate and to select the correct item. This feature also makes it easier for illiterate or non-English speaking inmates to independently and successfully use this service.

How it works

Using a unique identification method (biometric, inmate ID, RFID tag, pin number) authorized inmates log on. On successful identification the inmate's session is initiated providing personal account information and commissary services immediately, directly and accurately.

Using the Tusa Commissary system orders are collated by product and inmate. This information is used to produce printed labels and assemble orders for delivery.

Tusa Commissary keeps track of stock levels enabling automatic re-orders when minimum levels are reached, without affecting the inmate order process.

Benefits

Efficiency & Time Savings

More accurate and faster commissary transactions. Reduces staff time in responding to inmate commissary and account balance queries.

Automation

Streamline commissary processes to reduce work duplication, and ensure that staff resources are managed cost effectively.

Increase Revenue

Reduces overhead and increases Return on Investment through the implementation of a single system. Increases vending and commissary revenues.

Inmate Accountability

Inmate self-service ordering through easy to use product images reduces order errors and places responsibility with the inmate.

Flexibility & Convenience

Ease of integration with trust account and inmate management systems, allowing inmates to see real time transaction history and account balance.

Full Control

Flexible restrictions limit inmate ordering capability. Restrictions can be applied on various levels including medical condition, location and privileges.

Full Audit Trail

Records all actions and transactions carried out by inmates, and a full audit trail is stored.

Reporting

A range of flexible reports are available to meet the facility's information needs.

Single Platform

Central management of applications, system users and kiosks.

Security

Secure Logon

Access to commissary services available only for approved inmates.

Tamper Proof Software

Ensures inmates have no access to the internet and other restricted information or systems.

Functionality

Easy Order Entry

Inmates create an order list using the touch screen. Simple check boxes, drop down menus and product images help inmates accurately navigate the system and enter orders.

Real Time Information

Is always available to ensure inmates are not able to spend more money than is in their account.

Restriction Capable

Inmate order privileges and restrictions are fully determined by the facility, and are applied by the system.

Account History

Each transaction is date and time stamped and stored. Inmates can view order and account history without having to rely on staff.

Link to Trust Account

Allows inmates to view current balance before purchasing. Links can be provided to Tusa Trust Account or other third party systems.

Link to Inmate Management System

Enabling seamless integration of inmate information and preventing duplication of data.

Bilingual

Allowing for inmate communication in English and Spanish.
