

Digital Media

DIGITAL MEDIA SERVICES

Tusa Digital Media enables inmates to access interactive services to use within correctional facilities through personal media devices such as tablets and MP3 players.

Services include Music, e-Books, Pictures, Video, and other programs and services.

The system provides an easy to use and secure service for inmates to receive approved digital media by purchasing it themselves, or having it purchased by family, friends, or other sources.

Inmates can easily access and store Music, Video, e-Books, and Photos on a device. Other functions include access to Tusa's secure messaging system, message2you and Commissary.

The Digital Media Services feature makes it easier for illiterate or non-English speaking inmates to independently and successfully use available services.

How it works

Using a unique PIN number authorized inmates can log onto the device. On successful identification the inmate's session is initiated providing personalized information and services immediately, directly and accurately.

The Digital Media Service is linked to the Trust Account system. This allows inmates to view current balance information before purchasing. Links can be provided to Tusa Trust Account or other third party systems. The Digital Media Service has multi-lingual capability allowing for inmate communication in English and Spanish. Other languages are also available.

Media Types

Music

Inmates can search music by genre, artist, song name and album title.

E-Books

The inmate can browse through books by title and author. The inmate can benefit from self learning by downloading educational books.

Video/Movies

Inmates can browse through categories including educational, drama, science fiction and more.

Pictures

Inmates can store approved pictures they have received from family and friends through the secure messaging system, message2you, on their digital media player.

Benefits

Cost

There is no cost to the facility. Digital Media can save time and money through the reduction of staff tasks and implementation of a single system.

Control

Staff have full control over inmate access and can also control and limit the available choices of media to ensure only appropriate content is accessible to inmates.

Profile

Unique profiles for each inmate to access applications and library. Staff can then view a full audit trail of an inmate's activity.

Intelligence

Can help staff to gather information on inmates by tracking their activity through applications.

Single Platform

Central management of applications, system users and devices.

Functionality

Media Library

All media is stored in the library including songs, videos and pictures. All media downloaded can be organized and accessed through the media library at anytime. Inmates can browse a list of media through swipe menus to make their selection.

Media Store

With over 13 million songs, over 200,000 e-books and thousands of movies to choose from the media store offers something for everyone. Inmates have the option of previewing a song before purchase.

Media Modes

The Digital Media Services provides several play modes including delete, repeat, repeat all and shuffle capability.

Security

Secure Logon

PIN number for individual inmates to log on. Only approved inmates can access the Digital Media Services.

Downloads

Media purchased and downloaded by an inmate can't be downloaded for free by another.

Tamper Proof Software

Inmates have no access to the internet or other restricted information and systems.

Content

Only approved content from a pre-screened list is available to inmates. Content deemed a security risk or inappropriate will not appear on the list of available choices.

Security

Anti theft feature that locks out a device if it is reported lost or stolen. It will be rendered inoperable to anyone other than the rightful owner.
