

Message2You

SECURE ELECTRONIC
MESSAGING FOR
INMATES, FAMILY
AND FRIENDS

Tusa's Message2you is a secure electronic messaging solution enabling family and friends to send electronic messages to inmates in a secure and controlled way.

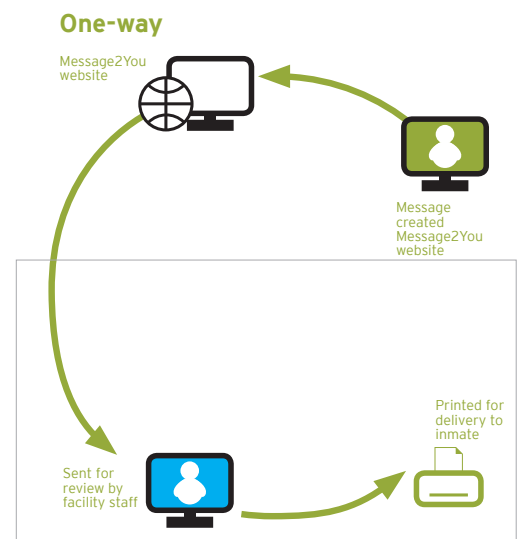

Utilizing Tusa's innovative, patented technology, Message2you is a flexible messaging system that can be configured to meet the rules and regulations of your facility. All messages are recorded and stored, allowing for full reporting and audit trail of all activities. Message2you helps reduce contraband being introduced into the facility and reduces staff time required for the processing of traditional mail.

Message2you is available as a one-way or a two-way communication tool.

Messages are initiated on the secure Message2you website by family and friends.

In the one-way communication model messages are received by the facility and reviewed before being printed and delivered to the inmate.

In the two-way model messages are received by the facility and reviewed before being forwarded to a secure kiosk where the inmate can view and reply.

Benefits

Efficiency & Time Savings

Reduces staff time in processing traditional mail due to automatic review and censoring features and reduction of time needed for contraband searches.

Reduces Contraband

Significantly reduces contraband and contaminants from entering the facility through correspondence.

Preemption & Evidence Gathering

Allows for preemption of potential criminal activity or facility disorder through interception of communications relative to plans or evidence.

Intelligence Gathering

All messages are stored and can be used for investigative purposes or intelligence gathering.

Encourages Communication

Strengthens family relationships to assist inmates with successful re-entry into the community.

Full Audit Trail

Includes all records of message review and censorship.

Single Platform

Central management of applications, system users and kiosks.

Security

Message2you is a stand-alone system and does not connect to any internal facility system. As experts in the corrections industry security is of the utmost importance to Tusa. The following measures are in place to ensure Message2you is the most secure inmate electronic messaging service;

NOT Email

Standard email methods such as SMTP are NOT used.

No Open Ports

Anywhere, not on the facility or the network side.

Message History

All messages are stored so that a complete messaging history is available at any time.

Attachment Approval

Attachments, such as photos, can be delivered only when approved by the facility.

VPN Link

A secure link from the facility to web message host service is provided.

Secure Log On

Access to messaging services is available only for approved external users, staff and inmates.

Control

Designed to give facilities unparalleled levels of control over usage, privileges, availability and security.

Functionality

Watchwords

A predefined list of words or phrases that are deemed suspicious can be set up. Messages containing watchwords are automatically flagged for review.

Automatic Review

Parameters can be set up to review messages for a particular inmate or external contact.

Electronic Censorship

Text can be highlighted and censored electronically.

Audit Trail

All review and censorship activities are included in the audit trail.

Reporting

A range of flexible reports are available to meet the facility's information needs.

User Approval

Authorized staff can approve Message2you user registration requests to ensure that only legitimate family and friends can send messages to inmates.

Funding

Message2you One-way is provided at NO COST to the facility.
